

osborn®

Tools for Power Drills

Product Catalog

Osborn
worldwide

Osborn offers the best solutions for your mechanical surface treatment challenges. Our experts are highly trained to serve you with the best off-the-shelf or customized tools, when and where you need them. Unlike others, we help you optimize your process, meet the highest quality and safety requirements and reduce your costs.

General Information	4
Power Drills	9
SKU Index	28

For efficient and safe deployment, always select the maximum possible brush diameter that can be fitted on the drive unit.

Because the circumferential speed is defined by the brush diameter, as mentioned above under working speeds, the performance of a brush can also be changed with this factor.

The following table provides an overview:

Remember the following before fitting a brush:

- The speed of the drive shaft of your machine must not exceed the maximum safety speed of the brush.
- The length of the drive shaft must fit firmly in the chuck.
- Brushes with clamp shaft can easily be fitted into standard drill chucks or collet chucks.
- The connecting threads of brushes have spanner flats, guaranteeing easy fitting and removal.

RPM min-1	Brush diameters (in mm)											
	20	40	50	80	100	125	150	180	200	250	300	350

Technical information & safety information for brushes

Working and clamping width of a brush

The working width defines the contact surface between brush and workpiece. To measure the working width, gently press together the trim area. The clamping width is measured between the cover plates. For products without cover plates, the clamping width corresponds to the body width.

Working and safety speeds

The maximum safety speed must be observed in line with workplace safety requirements. Information is in the product overview in this catalogue, on the packaging and on the brush itself (see picture). The working speed is defined by factors circumferential speed and brush diameter. The optimum working speed is generally far below the safety speed.

Brush diameter and trim length

The diameter of the brush (body of the brush) and the length of the respective trim are the determining factors for the working characteristics of the brush. Generally applicable:

- **Soft, flexible brushes,**
e.g. for working with textured workpieces and for gentle surface finishing.
- **More aggressive brushes,**
e.g. for deburring or removing dirt.

Optimal positioning of the brush in relation to the workpiece

One of the factors defining the contact pressure of a brush is its penetration depth at the workpiece. Never press a brush into the workpiece and only work with the tips of the filament. Excessive contact pressure lowers the brush performance and expedites wear. For manually operated machines, the recommendation is to only work with the weight of the machine. For an abrasive trim, a filament diameter of 3 times applies, e.g. 1.0 mm penetration depth for a filament diameter of 0.35 mm.

We will be glad to help out if you have questions.

Filament density of brushes

The filament density is determined by the number of filament tips per surface unit. High filament densities optimise cutting performance and useful lives (for deburring work for example). Lower filament densities increase the flexibility of the brushes and are the prerequisite for processing strongly profiled surfaces.

Fill Materials.

Types and Usage.

For our tools, we only use filling materials developed in our house or selected specially. Regular quality tests in our R&D labs guarantee highest material quality at all times. Below you find pictures of all the facing materials used for the tools in this catalog. The table shows the properties of all fill materials used by Osborn.

Steel wire

Stainless steel wire

Osborn special steel wire

Cordwire

Brass-coated steel wire

Brass wire

Material	Property	Additional Properties	Benefits	Used on
Steel wire	straight or flat	Most common trim material for brushes	■ Dimensionally stable ■ Diversity of applications	Steel, cast iron, softwood, hardwood
	crimped			Steel, cast steel
	knotted			
Stainless steel wire	straight	Standard alloys: 1.4310 and 1.4401 (1.4571 on request)	■ Usage in particular where residues of steel wires would adversely affect the surface (such as rust spots)	Stainless steel, non-ferrous metals, aluminium
	crimped			
	knotted			
Osborn special steel wire	straight		■ High-performance wire with high tensile strength ■ Long service life ■ For extreme brush applications	Steel, cast iron, softwood, hardwood
	crimped			
	knotted			
XTREME wire (steel wire)	stranded		■ Extremely long life ■ Combines the benefits of crimped and knotted wire	Steel, cast iron, softwood, hardwood
Brass-coated steel wire	Mono wire		■ High tensile strength	Steel, cast iron, softwood, hardwood
	Cordwire	stranded	■ Particularly well suited to texturing wood	
Brass wire	crimped			Non-ferrous metals, softwood

General Information

Synthetic bristles

Abrasive bristle

Novofil®

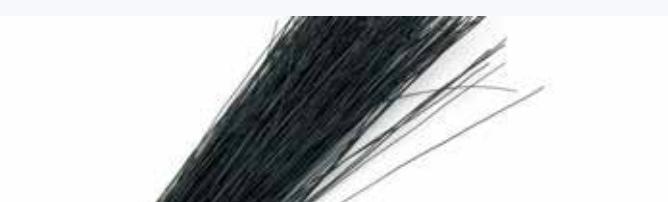

Novoflex-B®

Material	Property	Additional Properties	Benefits	Used on
Synthetic bristles	straight		<ul style="list-style-type: none"> ■ Abrasion-resistant ■ Resistant to weak acids and bases ■ Flexible 	Steel, cast iron, stainless steel, non-ferrous metals, aluminium
Abrasive bristle	Aluminium oxide	Nylon threads with aluminium oxide; red trim material	<ul style="list-style-type: none"> ■ High elasticity without risk of breakage ■ Uniform abrasive effect 	Steel, cast iron, stainless steel, non-ferrous metals, aluminium, wood
	Silicone carbide	Nylon threads with silicone carbide; blue trim material.	<ul style="list-style-type: none"> ■ High elasticity without risk of breakage ■ Uniform abrasive effect 	
	Ceramic, sintered twice	Aluminium oxide sintered twice; available in different hardness grades, light grey trim material	<ul style="list-style-type: none"> ■ Particularly hard and aggressive abrasive grit ■ The abrasive grit released during brushing has a better breaking edge and makes possible faster, more efficient deburring ■ Perfect results through uniform, homogeneous abrasive effect 	Steel, cast iron, stainless steel, non-ferrous metals, aluminium
Novofil®	round	High temperature resistance; available with different hardness, grit and filament thicknesses; abrasive can be made of chromium oxide, silicone carbide, aluminium oxide, zirconium, diamond or nylon resistant to extreme heat.	<ul style="list-style-type: none"> ■ High flexibility and trim density, prolonged life ■ For working with workpieces particular high in contours 	Steel, cast iron, stainless steel, non-ferrous metals, aluminium
	flat		<ul style="list-style-type: none"> ■ Very high abrasive grit content, higher removal rate (approx. 50% lower processing time) ■ Ideal for honing 	
Novoflex-B®	spherical	Trim material with aluminium oxide or silicone carbide; grit sizes from 60 to 400 possible	<ul style="list-style-type: none"> ■ Abrasive balls on flexible design ■ Tool is self-centring 	Steel, cast iron, stainless steel, non-ferrous metals, aluminium

Fibre

Horse hair

Material	Property	Additional Properties	Benefits	Used on
Fibre		Pure plant fibre	<ul style="list-style-type: none"> ■ For wet and dry application ■ Heat-resistant ■ Also suitable for polishing in conjunction with polishing compound 	All materials
Horse hair		Pure horse hair	<ul style="list-style-type: none"> ■ Excellent sealing properties

Power Drills

Wheel Brushes

Appearance can vary from picture depending on variant.

EUPBWB009 | SUPERIOR ★★★★☆

Wheel brushes, knotted wire

Knotted wheel brush, industrial quality, for use on power drills and high-speed machines.

- Osborn bestseller
- High cleaning performance
- 6 mm shaft enables simple mounting
- Also suitable for use on high-speed machines
- TÜV-Süd certified (safety tested, production monitored)

Application: Cleaning, deburring, removal of slag and silicates, weld seam finishing, removal of protective undercoating in car workshops.

Available on a practical display card with
Eurostandard hole for ideal presentation at the POS.

EUPBWB010 | SUPERIOR ★★★★☆

Wheel brushes, crimped wire

Crimped wheel brush, industrial quality, for use on power drills and high-speed machines.

- Thanks to a number of selectable trim materials and brush diameters there is a brush for every application
- Small brush diameter enables access to difficult to reached places
- Also suitable for use on high-speed machines
- TÜV-Süd certified (safety tested, production monitored)

Application: Edge honing, finishing bores, deburring and minor cleaning work.

Available on a practical display card with Eurostandard hole for ideal presentation at the POS.

Wheel brushes, crimped wire

Crimped wheel brush, craftsman quality, for power drills.

- Suitable for many DIY projects
- Easy to fit thanks to the shaft
- Flexible brush for simple cleaning tasks

Application: Cleaning work such as removal of paint, rust and scales.

Available on a practical display card with Eurostandard hole for ideal presentation at the POS.

Power Drills

Wheel Brushes

Appearance can vary from picture depending on variant.

EUPBWB012 | SUPERIOR ★★★★☆

Wheel brushes, stranded, crimped wire

Wheel brush with Cordwire, industrial quality, for use on power drills.

- Brass-coated, stranded steel wire
- Effective woodworking, high friction on soft and hardwood
- Suitable to working on surfaces due to large working width
- TÜV-Süd certified (design tested, production monitored)

Application: Excellently suited to texturing wood. The natural grain of the wood is emphasized and an antique or rustic effect is created. The filaments of the brush ream the softer places of the wood more than the hard ones. They expose the wood grain and leave a sort of relief surface.

Available on a practical display card with Eurostandard hole for ideal presentation at the POS.

Wheel brushes, abrasive filament

Grittyflex wheel brush with abrasive trim, craftsman quality, for power drills.

- Adapts perfectly to the workpiece's contours
- Brush with abrasive nylon, gentle on material
- When being used, new abrasive grit keeps being released so that the removal rate is uniform
- Different grit sizes generate different surface finishes (blue finer, red coarser)
- TÜV-Süd certified (safety tested, production monitored)

Application: Suitable for all materials; for the easy roughing and smoothing of surfaces (depending on grit thickness), product of choice for woodworking.

Available on a practical display card with Eurostandard hole for ideal presentation at the POS.

Available as part of a set. More on page 27
